ACTION CARD

Use this guide to a compact, offline checklist for assembling and validating a household evacuation kit for the first 72 hours after a disruption. Pack for the people, conditions, mobility limits, and routes actually relevant to your household.. Carry one copy in the master box and one copy in the working binder.

Step	Do this now	Completion check	Stop / escalate when
1	Confirm this copy is current: check the module ID (01) and REV date on the cover.	Module ID and REV noted on the working copy.	If the REV predates 2026-09-22, replace this copy before use.
2	Work through the Mission Profile section against your household's actual people, conditions, and equipment.	Section completed with household-specific entries; gaps flagged.	If a required capability is missing, flag it in the binder and resolve before the next drill.
3	Record completion, date, and any deviations in the working binder; schedule the next review.	Binder entry dated and filed.	If the household situation changes, re-run the guide.

PURPOSE AND ACTIVATION

Purpose: A compact, offline checklist for assembling and validating a household evacuation kit for the first 72 hours after a disruption. Pack for the people, conditions, mobility limits, and routes actually relevant to your household.

Activation triggers: utility failure, evacuation order, sudden service uncertainty, or a planned verification drill. This module is usable on its own; linked module IDs preserve the shared decision order from the master index.
