# LOOK INSIDE

## PKG-009 · Defense & Security Pack

Sample pages from: Off-Grid Household Safety And De-Escalation Guide

These are unaltered pages from the actual guide, taken from the current fixed library (Stage 4, 2026-10-30). Every EOTWSG guide opens with an action card, states its safety boundaries up front, and ends with printable fields for your household.

Full pack: shop.eotwsg.com · 14-day no-questions refund · Household license

# OFF-GRID HOUSEHOLD SAFETY AND DE-ESCALATION GUIDE

EOTWSG | MODULE P-01 | REV 2026-08-26 | STATUS: SOURCE-VERIFIED ONLY

AUTHORED BY: EOTWSG

## ACTION CARD

Keep people safe first: observe, communicate clearly, withdraw to a pre-planned safe location, offer mutual aid, and use calm, nonviolent words to reduce tension. Do not attempt structural work, traps, or forceful confrontation — call or meet trained responders when needed.

| STEP | DO THIS NOW | COMPLETION CHECK | STOP / ESCALATE WHEN |
|---|---|---|---|
| 1 — OBSERVE | Quietly note what is happening from a safe place (who, what, where, when). | Able to state the immediate facts to another person in one sentence. | You detect violence, weapons, fire, or imminent danger. |
| 2 — ALERT HOUSEHOLD | Tell family/housemates the simple plan (safe room, meeting point) using a pre-arranged phrase or signal. | All present acknowledge and move toward the plan. | Someone is missing, injured, or refuses to follow safety directions. |
| 3 — COMMUNICATE OUTWARD | Use phone, text, or short-range FRS radio to tell neighbors or agreed mutual-aid contacts what you know; call emergency services if needed. | Message sent and at least one recipient confirms receipt. | You hear or see escalating aggression, visible weapons, or hazmat conditions. |
| 4 — WITHDRAW / SEAL | Move to the agreed safe area or leave the property if that is the safer option; secure doors and close blinds without confronting others. | Everyone is at the safe location or clear of the hazard area. | Signs of structure fire, heavy smoke, or structural damage (leave immediately). |
| 5 — DE-ESCALATE / SUPPORT | From a safe distance, use calm phrases, lower voice, and listener-focused language. Offer basic aid to uninjured people and keep a | Tension reduces, or authorities are en route. | Direct threats, physical aggression, or weapons are present — stop engagement and call authorities. |

| | safe perimeter. | | |

# PURPOSE AND ACTIVATION

This guide helps household members remain safe during disturbances or uncertain events by prioritizing observation, clear communication, orderly withdrawal, nonviolent de-escalation, and short-term mutual aid. Activate this guide whenever you feel unsafe, when an incident near your home could affect safety, or when a neighbor requests help that you can safely provide.

# RESOURCE CHECKLIST

Printable quick checklist — check items you have and note gaps:

- [ ] Emergency contact list (household, neighbors, mutual-aid contacts)
- [ ] Primary phone and charger / power bank
- [ ] Short-range radios (FRS) and spare batteries; label ownership and channels
- [ ] Printed map of property with primary and alternate exit routes
- [ ] Designated safe location(s) and external meeting point
- [ ] First aid kit (contents noted, expiry checks scheduled)
- [ ] Flashlights and working batteries
- [ ] Simple incident log pad and pen (waterproof if possible)
- [ ] Mutual-aid agreements or neighbor check-in plan
- [ ] A printed copy of this module (EOTWSG MODULE P-01) stored with other emergency documents

# ACTION SEQUENCE

Follow these steps in order. One physical action per step. Major clusters end with an observable completion check.

1. Observe quietly from a safe position; note who is involved, where they are, and what is happening.

   Completion check: You can state the incident in one sentence to another person.

2. Alert household members using a pre-arranged phrase, shared gesture, or short message. Physically move people to the agreed safe location.

   Completion check: All household members are accounted for or you know who is not present.

3. Communicate outward: call emergency services if there is immediate danger; otherwise, message mutual-aid contacts or neighbors with concise facts (location, nature of incident, any immediate needs). Use FRS radios for short-range household communication; do not rely on GMRS without proper licensing.

   Completion check: At least one external contact confirms receipt or emergency services acknowledge the call.

**WARNING — BEFORE ANY DOOR OR WINDOW INTERACTION: Do not open doors or windows if opening them would expose you to direct threats, smoke, or unknown persons. If smoke or fire is present, evacuate immediately and do not re-enter.**

4. Withdraw to the safe area or leave the premises along the planned route. Bring essential items only if safe (phones, wallets, meds). Keep the group together and do headcounts.

   Completion check: Group is together at the safe area or off-site meeting point.

5. From the safe location, attempt nonviolent de-escalation only if safe and if you are trained or comfortable doing so. Use calm, short statements (see examples below) and maintain distance. Do not chase or block someone.

   Completion check: Conversation ends with lowered agitation or the person leaves the immediate area; otherwise disengage.

6. Provide mutual aid that does not require medical or technical training: offer phone access, water, a calm place to wait, or to relay messages to authorities. Keep records of what you do in the incident log.

   Completion check: Aid delivered and documented; if injuries exceed first-aid scope, wait for professionals.

7. After the incident, complete an incident report, update local fields and records, and schedule a brief household review or drill within 7 days. If any physical hazards remain (structural damage, battery smoke, unknown chemicals), do not attempt repairs — notify professionals.

   Completion check: Incident log completed and drill scheduled.

De-escalation sample phrases (short, non-confrontational):

- "I want everyone to stay safe. Can we slow down and talk about this?"
- "I'm listening. Help me understand what you need right now."
- "Let's all take a step back and give each other space."

## SAFETY BOUNDARIES

- Do not build or use traps, barriers intended to injure, or any device designed to block or harm people or vehicles. Those are unlawful and dangerous.
- Do not engage physically, pursue, or attempt to disarm anyone. Prioritize withdrawal and calling trained responders.
- Do not perform structural modifications or heavy construction (trenches, gabions, vehicle traps). Such work can cause collapse, injury, and legal violations.
- Do not offer medical diagnosis or invasive care beyond basic first aid; call emergency medical services for significant injuries.
- Respect privacy and lawful limits when sharing incident details; share only what is needed for safety and response.
- When using radios or other comms: follow applicable rules. FRS is license-by-rule; GMRS requires an FCC license in the U.S. Rely on manufacturer labels and public-safety guidance for safe operation of equipment.
